

Windows that belong to the architecture.

Residential & Hospitality Project Portfolio / 2026

Shanghai · Bespoke windows & doors · Since 2005

WHO WE ARE

Architectural openings, made personal.

Tomars develops bespoke window and door systems for villas, hospitality and character-led residences.

20+

years of specialist experience

Shanghai

design coordination and manufacturing

One-to-one

custom specification and project service

OUR APPROACH

A window is part of the room, not an accessory.

Proportion, sightline, material and movement are resolved together - from concept to installation.

01

Architectural fit

Openings coordinated with façade rhythm, interiors and views.

02

Material integrity

Timber warmth, aluminium protection and carefully selected glass.

03

Bespoke engineering

Special shapes, large spans, hardware and finish options.

Four architectural languages. One custom process.

Each collection is a starting point. Profiles, glazing, hardware and finishes are tailored to the project.

HERITAGE

Chinese and New Chinese residences

CONTEMPORARY

European and American villas

PANORAMA

Large glass and slim sightlines

CUSTOM

Special forms and one-off solutions

PANORAMA COLLECTION

More glass.
Less interruption.

Slim aluminium frames, picture windows and sliding systems frame the view while keeping the interior calm.

Large-format glazing · Corner conditions · Low-E options

HERITAGE COLLECTION

Traditional rhythm, modern performance.

Wood proportions, lattice language and courtyard views are translated into thermally considered, weather-resistant systems.

Chinese style · New Chinese · Timber-aluminium

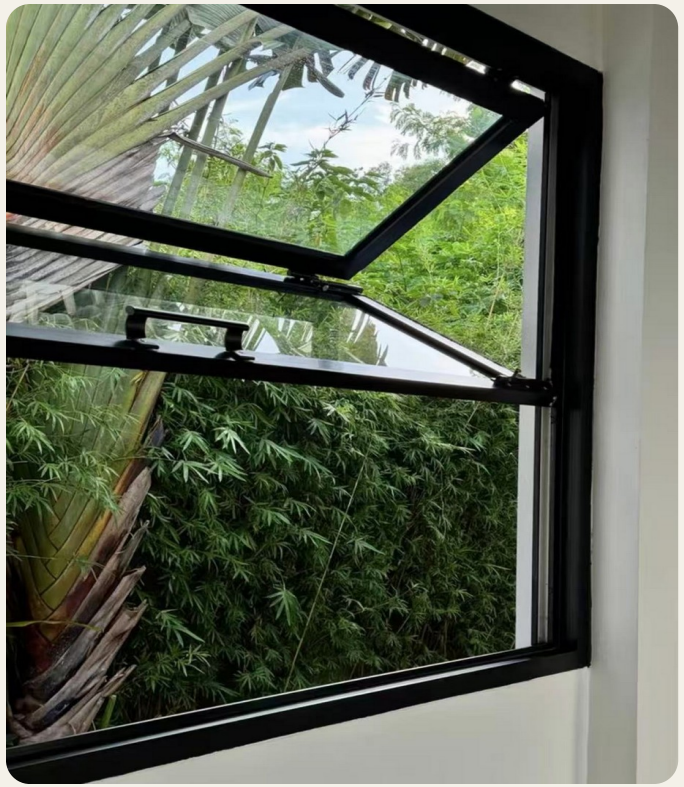

CONTEMPORARY COLLECTION

Classical façades. Clean detailing.

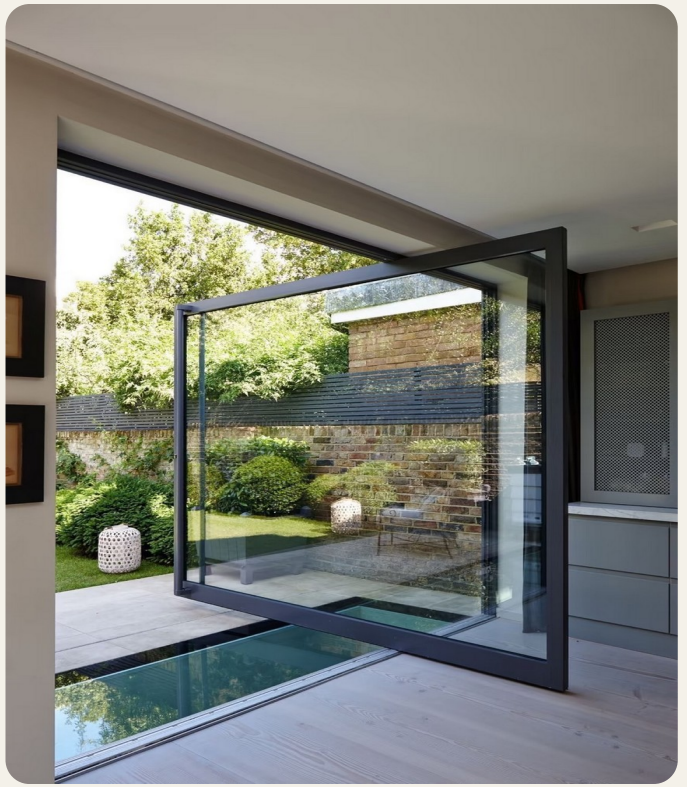

Balanced mullions, refined colours and custom entrance compositions for European and American-style villas.

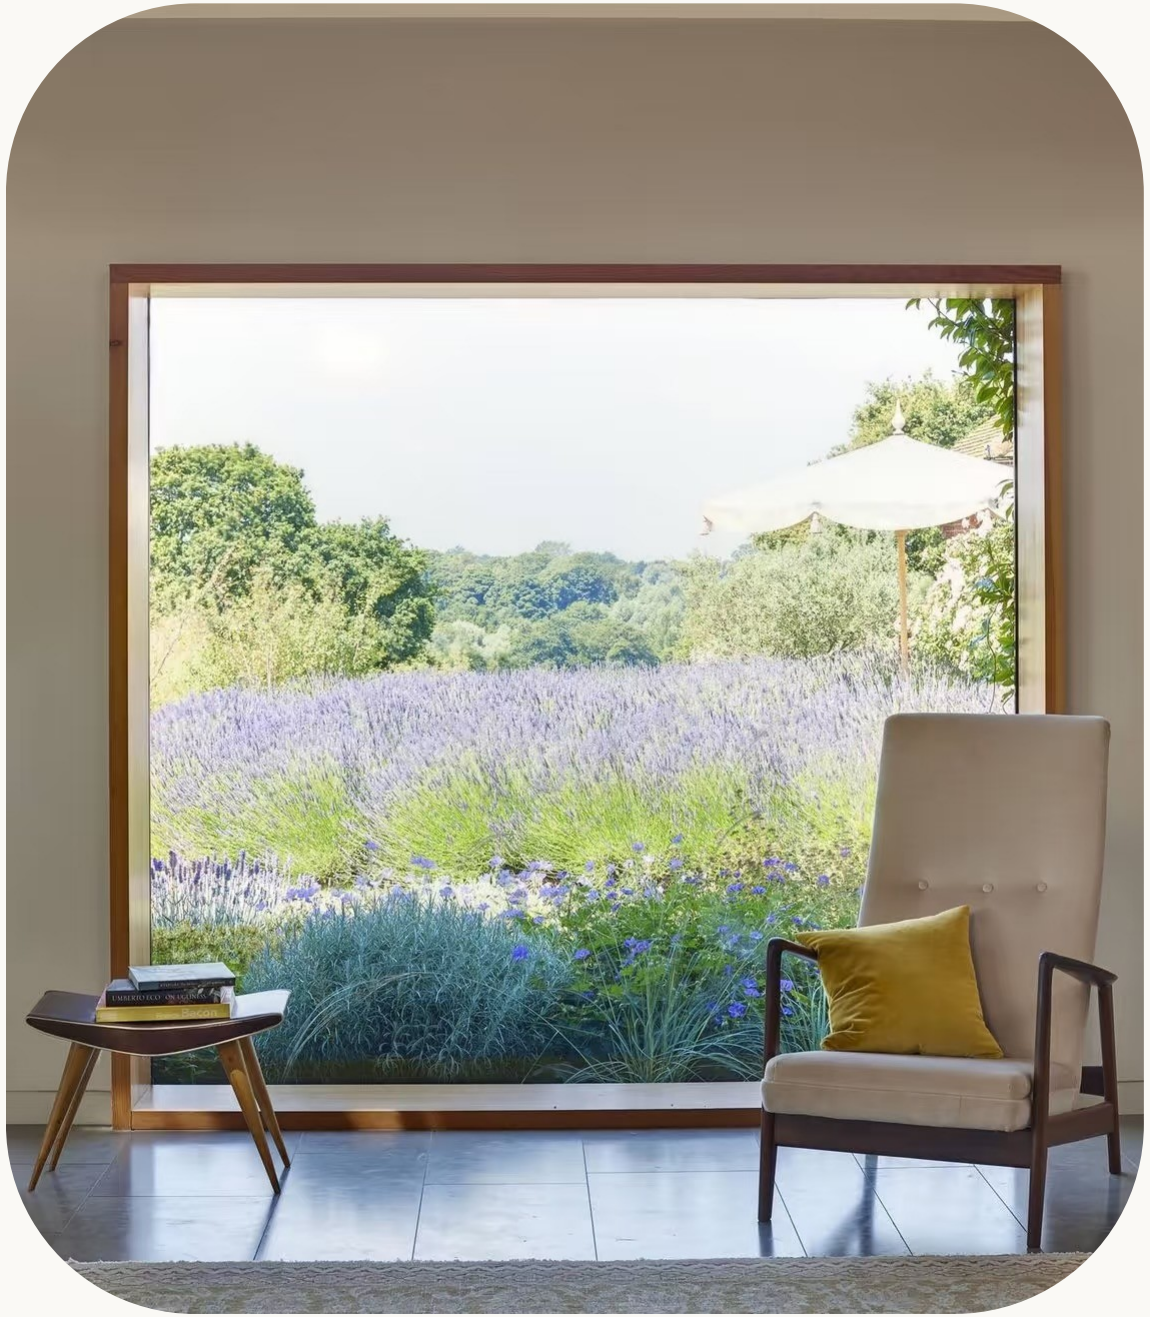

When standard sizes are not enough.

Arched heads, bay arrangements, uncommon opening types and bespoke colours are coordinated around the architecture.

Openings designed for how a room lives.

Casement

Awning and hand-crank

Fixed and picture window

Sliding and hung

Corner and special shape

Wood-aluminium / aluminium / custom glazing

A strong entrance.
A quiet transition.

Entrance doors

Pivot doors

Folding doors

Slim-frame sliding doors

Custom doors

Scale, movement and hardware are specified together.

Luxury is felt in the details.

The visual line stays simple because the engineering behind it has been carefully resolved.

THERMAL

Insulated glass and thermally considered frame options.

HARDWARE

Opening movement, security and handle language selected by use.

FINISH

Timber species, stain, aluminium colour and sheen coordinated.

Built work across distinct architectural styles.

A selection of completed villa and residential projects supplied by Tomars.

PROJECT SERVICE

One team from opening schedule to delivery.

01 Review drawings and performance needs

02 Develop profiles, divisions and finish samples

03 Coordinate shop drawings and production

04 Quality check, pack and support installation

Bring us the architecture.
We will resolve the openings.
